

Quality, Safety and Environment Policy and Objectives

Beth-El Zikhron Yaaqov Industries Ltd.

Beth-El Industries produces a variety of products which many of them will save lives.

The organization's goal is to maintain quality, safety for all and occupational health for the benefit of all our employees. Furthermore we are concerned about protecting our environment. In order to secure and improve the quality level and to strengthen our customers' confidence, we are following since 1995 our Quality Assurance System according to **ISO 9001**.

Beth-El's goal is to prevent safety risks and environmental pollution for our wellbeing and that of our surroundings. Therefore we adopted the requirements of the **OHSAS 18001** (Occupational Health and Safety) & **ISO 14001** (Environmental) Standards. For our public protection products we underlie the quality monitoring of SII (Standard Institute of Israel).

We are also accredited according to **AS 9100** Aerospace Standard for rendering precision machining services. On the basis of these standards, we are committed to exceed the expectations and requirements of our customers, to fulfill all our agreements and to provide high quality service.

The Quality, Safety and Environment Policy is based on the following conditions:

- Compliance with Regulatory Law and Standards;
- Implementation and execution of our technical capabilities;
- Reliability and professionalism;
- Implementation of new ideas and improvement processes within the company;
- Providing solutions that meet the requirements of our customers.

Measurable objectives of continuous improvement and annual management evaluation:

- Customer satisfaction;
- Occupational health and safety;
- Quality costs;
- Nonconformities, corrective and preventive actions;
- Cost-effective, efficient and ecological manufacturing process;
- Minimizing adverse effects on safety and environment.

In order to accomplish these objectives we plan to:

- Set measurable goals in the fields of quality, environmental, safety and occupational health and evaluate the achievement of these goals.
- Continually update and improve the quality management system and manufacturing processes in accordance with the requirements of international standards.
- Optimize energy use, water consumption and reducing waste.
- Train employees in prevention and avoidance of environmental impacts.
- Increase professionalism and qualification of our employees at all levels.
- Prevent errors and systematically remove sources of errors.

Quality is our way to success, ensuring continued growth of our company.
