

Marine Alutech Oy AB, a Finnish dockyard, has selected Beth-El Zikhron Yaaqov Industries Ltd. as partner for the delivery of Ventilation / NBC-Filtration Systems as well as the Air Conditioning Systems for its contract with the Finnish Navy.

Under the contract, Marine Alutech Oy AB will deliver 12 fast patrol boats Watercat M18, which are equipped with Beth-El's VM-Series of systems, which offer best protection against Nuclear, Biological and Chemical Warfare agents as well as Toxic Industrial Chemicals. Due to the longevity of the filters the units can run around the clock for months and years without interruption.

Additionally Beth-El Industries will deliver the sea-water cooled Air Conditioning Systems for the boats.
