Beth-El Industries (BEI) produces a variety of products, many of which are life-saving. The organization’s goal is to maintain product quality, safety and occupational health for the benefit of all our employees. In addition, we are making efforts to protect our environment.

Standards with which Beth-El is compliant:

- **ISO 9001**: In order to ensure high quality and to maintain our customers’ confidence, BEI has implemented the ISO 9001 Quality Management System since 1995.
- **ISO 45001 & ISO 14001**: BEI cares about the health and safety of each employee, as well as the environment we operate in. Accordingly, we have adopted the requirements of the ISO 45001 (Occupational Health and Safety) & ISO 14001 (Environmental) standards.
- **AS 9100**: We are also accredited according to the AS 9100 Aerospace Standard for providing precision machining services.
- Our civil protection products are regulated by the continuous quality monitoring system of the SII (Standards Institute of Israel) called “Tav Teken” (Standard Mark)

On the basis of these standards, we are committed to fulfilling the expectations and requirements of our customers, providing high quality service and maintaining product safety. Furthermore, we are committed to comply with regulatory law for the environment, safety and occupational health in Israel.

**Our Quality, Safety and Environmental Policy** help to ensure:

- Compliance with regulatory law and standards in Israel
- Consistent implementation and execution of our technical capabilities
- Reliability and professionalism
- Implementation of new ideas and continuous improvement in our QMS (Quality Management System), EMS (Environmental Management System) and OH&S (Occupational Health and Safety Management System)
- Providing solutions that meet the requirements of our customers
- Protecting the environment and also preserving natural resources

**Measurable performance objectives for management review are:**

- Customer satisfaction
- Quality costs
- Non-conformities, along with containment, correction and corrective action(s)
- Cost-effective, efficient and ecological manufacturing processes
- Occupational health and safety conditions (in regards to employees’ safety and wellbeing)
- Minimizing adverse effects on safety/health and the environment in accordance with the laws in Israel

**In order to accomplish these objectives, we:**

- Set measurable goals related to quality, the environment, safety, and occupational health, and evaluate the achievement of these goals
- Continually update and improve the QMS and manufacturing processes in accordance with the requirements of international standards and Israeli law
- Optimize energy use, water consumption and reduce waste
- Train, involve and consult with employees about prevention and avoidance of environmental/health impacts, accidents and hazard awareness
- Increase the professionalism and qualification of our employees at all levels
- Prevent errors and proactively remove sources of potential errors

**Quality is our way to success, ensuring the continued growth of our company.**
